

# Getting eTexts Through Blackboard LMS

The steps below describe how to get eTexts for Texidium through the Blackboard Learning Management System (LMS). A similar process will apply if your school uses a different LMS (e.g. Moodle, Canvas, D2L).

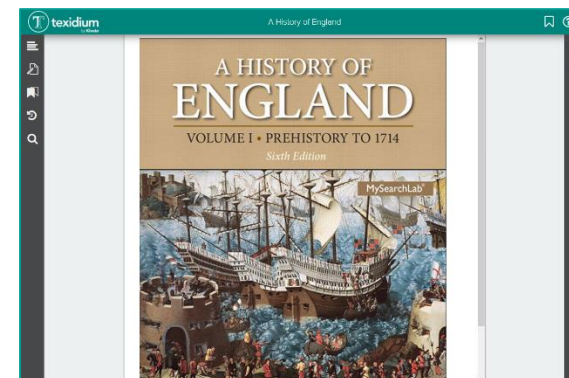

## 1. Sign in to Blackboard.

Speak to your course instructor or IT Helpdesk if you need help finding or signing in to your school's Blackboard site.

## 2. Find your eTexts.

The exact location of your books depends on your school's Blackboard configuration. They may be on a central eText page or within pages devoted to the courses they're used in.

## 3. Click on an eText.

Click on the eText you wish to read. You are directed to Texidium's online reader, with the book you clicked on open.

You are free to read your books Texidium's online reader as an unregistered user. However, unregistered users can't read offline, use the Texidium apps, download their books, or sign in to Texidium directly (you'll need to access your books as described above whenever you wish to read them).

To get the most out of Texidium and your eTexts, click **Unregistered** in the Texidium Library, and then click **Register** to register for Texidium.

(Click the Texidium logo in the top-left corner of the online reader to reach the Library)
