

Digital resources for a digital world

All students.
All resources.
All of the time.

About Texidium by Kivuto

Texidium simplifies and accelerates the delivery of personalized digital course material (eTexts, software, and other course materials) to each student while keeping costs low for organizations, students, and content owners. Our modular platform is flexible enough to accommodate a variety of requirements and needs, and the Texidium solution provides a clear, easy transition to an institutional purchase model.

Texidium is a proud member and supporter of the Radium Foundation and the International Digital Publishing Forum.

Collaboration becomes innovation

Texidium is backed by trusted experts in education technology who are capable and ready to connect you with the leading platform for digital educational resources.

Kivuto Solutions has been committed to improving student success through education technology since 1997. Over 60,000 schools and departments trust Kivuto to manage and distribute software to their students, faculty and staff. Kivuto proudly supports 195 countries in 14 languages.

Dedication to student success is Algonquin College's guiding principal. Recognized as a leader in the use of educational and digital technologies, Algonquin currently has over 17,000 students involved in programs with laptop computers, and nearly 10,000 students in programs that use eTexts.

Improving student outcomes

We are here to support the transformation to a world where all students have access to digital learning resources and content anytime, anywhere and on any device.

We strive to improve student outcomes by centralizing multiple, key components into one digital resource management and delivery platform. Through this platform, students will benefit from the ease of use, reduced resource costs, immediate and ubiquitous access to course material and software, and a collaborative learning experience. Best of all, students can access all of their eTexts anytime, anywhere and on any device.

The digitization of printed textbooks has numerous advantages that engage readers and support active learning environments. Digital textbooks enable publishers to embed rich, interactive multimedia in the form of videos, photographs, audio files. Moreover, graphs can include associated spreadsheets, text can contain hyperlinks to other source material, note-taking can be included, bookmarks can be added, and so on. The implications for learning are endless.

Additionally, institutions no longer need to track inventory or ship printed textbooks to their various locations.

A background image showing a student with a beard and glasses, wearing a white t-shirt, sitting at a desk in a library or study area. He is looking at a laptop screen. There is a white coffee cup on the desk in front of him. The background is slightly blurred, showing bookshelves and other study materials.

“Texidium removed all the challenges I had with physical textbooks. I don’t need to worry about forgetting my books at home or carrying a heavy backpack to each class, and I have access to my course materials on almost any device.”

Richard Guy – *Computer Engineering Technology –
Computing Science, Algonquin College*

Our solution

With Texidium by Kivuto, you can access digital textbooks and resources on any device, anywhere, at any time. The Texidium platform includes three key components that are flexible to your needs as you transition to digital textbooks: our Resource Adoption System (RAS), Digital Resource Portal (DRP), and eReader platform.

Resource Adoption System (RAS)

Request and manage digital and printed textbooks and other course material from leading publishers, assign books to courses and students, and more.

Digital Resource Portal (DRP)

Quickly and securely deliver course materials to your students through a WebStore customized to your school.

The Texidium eReader

Access course materials through a cloud-based eReader that adheres to accessibility standards and is available on all popular devices.

Inclusive access model

Texidium provides a clear and simple solution for large-scale, school-wide adoption of digital course materials. Fees can be included within student tuition or posted to student accounts, reducing the cost of digital textbooks to students.

Texidium also supports a hybrid model of institutional purchase and student purchase in which you can collect fees via tuition, course fees, and any additional payments with our embedded e-commerce engine for your convenience.

To find out more about the inclusive access model and how it works in your school, please contact the Texidium team at texidium@kivuto.com.

Texidium benefits

Better access. Better results.

Texidium improves student success, engagement, and retention by making textbooks and learning resources digital, affordable, and interactive. Your school will become more collaborative, sustainable, and innovative with Texidium in the classroom. Explore a world of new learning features both online and offline.

Benefits for schools

- Reduce the cost of resources for you and your students in the long run
- Strengthen your leadership in education technology and innovation
- Make required texts more accessible through resources including text-to-speech reading
- Streamline resource management by eliminating physical textbook inventory and shipment

Benefits for educators

- Access digital texts for your courses anytime, anywhere, and on any device
- Enhance your classroom learning environment by pushing your notes to your students' devices in real time
- Use our book adoption system to easily browse and choose resources for your courses
- Gain deeper understanding of your students' progress and engagement with analytics

Benefits for students

- Search through books easily with a built-in library, chapter, and page navigation
- Mark up pages, tag notes, and even colour-code points for easy reviewing later
- Save money and time: no more buying heavy, pricey textbooks
- Pick up where you left off with notes, bookmarks, and highlights that sync across all devices
